Education

Delhi Technological University Jul 2024 – Present
Bachelor of Technology (Information Technology) *CGPA: 8.30*

KVS No.3 Delhi Cantt Jan 2024 – Dec 2024
CBSE (Class XII) *Percentage: 91.2%*

Experience

CERT-In Dec 2025 – Jan 2026
Cybersecurity Intern *Hybrid — New Delhi*

- Analyzed network traffic using Zeek logs to identify **APT29** attack patterns through DNS behavior and connection-level features.
- Performed feature engineering, normalized traffic, and ran correlation analysis to detect **C2 communication** and potential data exfiltration.
- Compared **SCRANTON** and **NASHUA** datasets using statistical and visual analysis to distinguish malicious and benign traffic.

Technologies: *Python, Pandas, NumPy, Matplotlib, Zeek, Network Traffic Analysis, Data Visualization*

Projects

CyberSight – Distributed Multi-Agent SOC Triage Platform GitHub Live

- Architected an event-driven platform (LangGraph supervisor, **3 specialist agents**, **9 tools**) on Celery, Redis and PostgreSQL that triages **10K+ alerts/hour** at **p95 under 8 s** with **99.9%** job durability.
- Evaluated on a frozen **2,500-alert** holdout (3 runs, 95% CIs): **97%** precision, **94%** recall, **85%** fewer false positives and **40%** lower cost per alert versus a single-LLM baseline, with **0** true attacks auto-closed.
- Hardened with Argon2id, CSRF protection and RBAC (**0 bypasses** across a **50-payload** prompt-injection suite), backed by **2,000+ tests** at **90%** coverage in CI, sustaining **99.5%** uptime over **30 days** (load-tested at **200 req/s**).

Technologies: *Python, FastAPI, LangGraph, PostgreSQL, Redis, Celery, Docker, OpenTelemetry, Prometheus, CI/CD*

QueryClarify – Agentic RAG Text-to-SQL System GitHub Live

- Designed an agentic LangGraph pipeline for Text-to-SQL that detects ambiguous questions (**92%**) and routes each query to the right database (**96.5%** accuracy) before generating SQL.
- Engineered schema-aware retrieval across **157 databases** and **779 tables**, reaching **90.4%** execution accuracy on 594 queries (**+4.9pp** over the non-RAG baseline).
- Implemented guardrails that recovered **23%** of failed queries and blocked **60/60** adversarial test cases, protecting data integrity.

Technologies: *LangGraph, Groq, ChromaDB, FastAPI, MySQL, RAGAS, LangSmith, Python*

CodeAtlas – AI-Powered Python Codebase Intelligence Platform GitHub Live

- Developed an AST analyzer and NetworkX call graph for Python repos, scaled to **4,500+ files** and **23,000+ nodes**.
- Trained a calibrated Logistic Regression risk model on BugsInPy (**3,700+ samples**, **30+ projects**), reaching **80.2%** ROC-AUC, **61.1%** PR-AUC and **0.124** Brier score.
- Built graph-aware RAG with Gemini (**73.8%** answer relevance, **+6.1pp** vs plain RAG) and **20+** security checks.

Technologies: *Python, FastAPI, NetworkX, Scikit-learn, Gemini, React, Vite, Tailwind CSS*

Technical Skills

Languages: C++, Python, JavaScript, SQL, HTML, CSS
AI / GenAI: LangGraph, Multi-Agent Systems, RAG, Gemini API, Groq, ChromaDB, RAGAS, LangSmith
ML & Data: Scikit-learn, XGBoost, Logistic Regression, Random Forest, Probability Calibration, NumPy, Pandas, Matplotlib
Frameworks & Libraries: FastAPI, Flask, React.js, Vite, Tailwind CSS, NetworkX, Celery
Databases: MySQL, PostgreSQL, Redis, ChromaDB, FAISS
CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks
Tools: Git, GitHub, Docker, GitHub Actions, OpenTelemetry, Prometheus, Jupyter Notebook, Vercel, Zeek
