Education

Delhi Technological University Jul 2024 – Present
Bachelor of Technology (Information Technology) *CGPA: 8.30*

KVS No.3 Delhi Cantt Jan 2024 – Dec 2024
CBSE (Class XII) *Percentage: 91.2%*

Experience

CERT-In Dec 2025 – Jan 2026
Cybersecurity Intern *Hybrid — New Delhi*

- Analyzed network traffic using Zeek logs to identify **APT29** attack patterns through DNS behavior and connection-level features.
- Performed feature engineering, normalized traffic, and ran correlation analysis to detect **C2 communication** and potential data exfiltration.
- Compared **SCRANTON** and **NASHUA** datasets using statistical and visual analysis to distinguish malicious and benign traffic.

Technologies: *Python*, *Pandas*, *NumPy*, *Matplotlib*, *Zeek*, *Network Traffic Analysis*, *Data Visualization*

Projects

QueryClarify – Agentic RAG Text-to-SQL System GitHub Live

- Architected an agentic Text-to-SQL system using LangGraph, achieving **92%** ambiguity detection and **96.5%** routing accuracy for query understanding and database selection.
- Built schema-aware RAG across **157 databases** and **779 tables**, yielding **90.4%** execution accuracy on 594 queries, a **+4.9pp** improvement over the non-RAG baseline.
- Implemented security guardrails, recovering **23%** of failed queries and blocking **60/60** adversarial cases to ensure data integrity.

Technologies: *LangGraph*, *Groq*, *ChromaDB*, *FastAPI*, *MySQL*, *RAGAS*, *LangSmith*, *Python*

CodeAtlas – AI-Powered Python Codebase Intelligence Platform GitHub Live

- Built an AST-based analyzer that converts Python repositories into a NetworkX call and dependency graph, powering an interactive Code Map that scaled to **4,500+ files** and **23,000+ nodes** in stress tests.
- Trained a StandardScaler, Logistic Regression and Isotonic Calibration risk model on BugsInPy (**3,700+ samples**, **30+ projects**) with project-aware validation, reaching **80.2%** ROC-AUC, **61.1%** PR-AUC and a **0.124** Brier score.
- Developed graph-aware RAG with Gemini that fuses retrieved code with caller and callee context, achieving **73.8%** answer relevance, **+6.1pp** over plain RAG, and added static-only security checks across **20+ patterns**.

Technologies: *Python*, *FastAPI*, *NetworkX*, *Scikit-learn*, *Gemini*, *React*, *Vite*, *Tailwind CSS*

Technical Skills

Languages: C++, Python, JavaScript, SQL, HTML, CSS
AI / GenAI: LangGraph, RAG, Gemini API, Groq, ChromaDB, RAGAS, LangSmith
ML & Data: Scikit-learn, XGBoost, Logistic Regression, Random Forest, Probability Calibration, NumPy, Pandas, Matplotlib
Frameworks & Libraries: FastAPI, Flask, React.js, Vite, Tailwind CSS, NetworkX
Databases: MySQL, ChromaDB, FAISS
CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks
Tools: Git, GitHub, VS Code, Jupyter Notebook, Vercel, Zeek

Achievements

- LeetCode **Knight** – Max Rating **1942**, Top **3.42%** globally
- Codeforces **Pupil** – Max Rating **1384**
- Solved **1000+** coding problems across LeetCode, Codeforces, and GeeksforGeeks
